Inspection and Repair Week The week of March 1 is set aside all over the United States as the time when patriotic farmers from Maine to California are to be asked to look to their farm machinery requirements for the coming season. This "inspection week" is in keeping with the efforts of our governwheth-combined with effective preparedness. Farm machinery represents labor economy as never before, and implements or machines not in working order are poor assets to Uncle Sam when it comes to

new machinery entirely. If the farmers of the country respond to this call, it will result in their taking steps at once to secure their needed repairs and arrange for new equipment.

Now, we are going to make it the great effort and study of our business life to meet the demands of our custom ers the coming season in this most im-portant movement. We believe this is our big drive for the year 1918. No one knows just what will win the war, but everyone knows that the farmer will do his share and that is the lion's share.
